2-84, Dacharam ,Nalgonda

## Projects

1. Created My portfolio using HTML ,CSS and Java Script
- 2.Built a sleek and intuitive calculator using HTML, CSS, and JavaScript.
- 3.Developed a functional banking interface with Python
- 4.Developed a quiz game in C - Language

## About Me

"I'm an enthusiastic student passionate about using data science and web development to tackle real-world challenges. I believe data holds the key to understanding complex problems and predicting future outcomes. My web development skills allow me to translate these insights into accessible and user-friendly solutions that everyone can benefit from." "My curiosity extends beyond our planet, as I'm fascinated by the mysteries of the universe. I'm always eager to learn more about its intricate workings and the potential technological advancements that could unlock its secrets." "In essence, I'm a data-driven problem solver with a knack for building user-centered web experiences and a boundless fascination with the cosmos."
